Smitha Patige

Senior Product Manager | AI, Data & Enterprise Platforms | GenAI • Agentic AI | Product Strategy & Delivery
Farnborough, England, United Kingdom

Summary

Senior Product Manager with 16+ years in technology — 5+ years owning enterprise platforms, CRM, data, and AI — with a strong track record of turning complex technology challenges into products that deliver measurable business outcomes At GE Healthcare, I led the sales CRM platform end-to-end — a global system shared across services, marketing, and downstream ecosystems. I owned the Indirect Channel Partners onboarding initiatives, unifying a fragmented partner journey (compliance, PRM, CRM) into one seamless experience. In parallel, I drove multiple initiatives to improve platform performance, efficiency, and scalability — including a Heroku initiative and a migration from legacy middleware to Salesforce Data Cloud. A £1.5M platform investment I led delivered £90M in 3-year ROI, 22% Revenue Growth, Increased Platform efficiency by 30%, and I improved forecast accuracy from 65% to 92% while reducing partner churn. Since 2025, I've been building my AI product strategy muscle: identifying where AI genuinely solves a problem versus where it's a distraction, evaluating build-vs-buy tradeoffs for AI capabilities, thinking through data readiness, guardrails, and human-in-the-loop design, and prototyping agentic workflows to pressure-test my own thinking before recommending a direction. I'm also currently completing an AI Product Management programme to formalise this into a repeatable framework. I bring a blend of technical depth, global platform ownership, and sharpening AI product strategy — and I'm always open to conversations about product roles where that combination adds value. London, UK | Right to Work in UK | Open to Senior PM roles

Experience

Independent / Self-Employed

Senior Product Manager — AI & Product Innovation (Independent)
January 2024 - Present (2 years 10 months)
London Area, United Kingdom

Building hands-on experience in Generative AI, AI agents, automation and AI product management through practical product prototypes and experimentation.

• Halo: Building an AI-powered school communication assistant that reads emails, identifies urgent actions and upcoming events, and personalises information based on the child's name and class — helping parents avoid missing important updates.

• Dog Walker: Designed and prototyped a tracking and activity management product using Lovable and Cursor, taking the concept from user problem to working prototype.

• AI Research Automation: Built a workflow to collect, summarise and analyse LinkedIn posts and generate actionable insights.

• AI Product Management: Currently attending an AI Product Management Cohort, with hands-on exploration of GenAI, LLMs, RAG, AI agents, agentic workflows and responsible AI.

GE Healthcare

Senior Product Manager

January 2019 - January 2024 (5 years 1 month)

• Owned product vision, strategy, and roadmap for a global enterprise Salesforce platform — serving multi-region sales teams and 200+ integration partners across medical device categories (MRI, imaging, ultrasound).

• Turned £1.5M platform investment into £90M 3-year ROI with 6-month payback • Drove +22% revenue growth; improved forecast accuracy 65% → 92%; reduced churn 18% → 14.5%; increased adoption 40%

• Built AI/ML product features — opportunity scoring, entity resolution (–35% data duplicates), intelligent automation (+65% productivity) — with governance and bias monitoring built in

• Led Data Cloud/Customer 360 transformation: integrated Salesforce CRM, Marketo, and enterprise data sources; established data governance and lineage standards

• Built map-based geospatial route planner integrated into Salesforce mobile: A/B piloted with 15 reps → +28% daily visits, 32% travel cost reduction, $3M+ new deal value

• Led 50+ engineers in SAFe Agile environment; managed PI planning, sprint ceremonies, and cross-boundary dependencies across 4 regions

HP

7 years 3 months

Technical Product Specialist

August 2012 - January 2019 (6 years 6 months)

• Led development of a Managed Print Services (MPS) - cross-platform mobile app connecting enterprise customers to HP cloud for real-time printer fleet management - field-facing, shaping how field engineers accessed and acted on data in real time

• Owned end-to-end product lifecycle across iOS and Android: requirements, delivery, stakeholder alignment, and continuous iteration

• Defined API contracts and integration architecture on GCP (BigQuery, Pub/Sub, Cloud Storage) — real-time telemetry ingestion, automated alerting pipelines, and predictive analytics at enterprise scale

• Built cloud-connected health diagnostics - which remotely diagnosed fleet issues and auto-raised service tickets

• Developed predictive cartridge refill logic using historical usage data — early application of data-driven automation

• Led team of 7 engineers within 50+ engineering organisation; drove 28% velocity improvement through Agile practices

Senior Software Engineer
November 2011 - July 2012 (9 months)
Bengaluru, Karnataka, India

Delixus, Inc.
4 years 4 months

Senior Software Engineer
July 2008 - October 2011 (3 years 4 months)

Software Engineer
July 2007 - July 2008 (1 year 1 month)

Education

The ICFAI University, Dehradun
Master of Computer Applications - MCA, Computer and Information Sciences and Support Services

Little Flower English Medium Convent School
BCom, MCA
